

Identifier	Given/When/Then
<p style="text-align: center;"><b>Administrator Behaviors</b></p> <p>Users want the ability to sign up for the service, use their accounts, and modify account information as necessary.</p>	
A1	Given I Am On "Signup" And I Entered Correct Information When I Submit The Form Then I Am Signed Up
A2	Given I Am On "Signup" And I Entered Incorrect Information When I Submit The Form Then I Am Not Signed Up
A3	Given I am on "Login" And I Entered Correct Information When I Submit The Form Then I Am Logged In
A4	Given I Am On "Login" And I Entered Incorrect Information When I Submit The Form Then I Am Not Logged In
A5	Given I Am On "Account" When I Correctly Modify "Account Information" Then "Account" Fields Have "Been" Changed
A6	Given I Am On "Account" When I Delete My Account Then My Account Is Deleted
A7	Given I Am Logged Out When I Attempt To Navigate To "Account" Then I Can Not See Account Information
A8	Given I Am Logged In When I Attempt To Navigate To "Account" Then I Can See Account Information
A9	Given I Am On "Account"

	When I Incorrectly Modify "Account Information" Then "Account" Fields Have "Not Been" Changed
A10	Given I want to create a new admin When I send a valid request Then a new admin is created.
A11	Given I want to create a new admin When I send a request without an admin body Then I receive an error code.
A12	Given I want to retrieve information about an admin When I send a valid request with the account's authorization token Then I receive the admin's information.
A13	Given I want to retrieve information about an admin When I send a request with an invalid authorization token Then I receive an error code.
A14	Given I want to update an existing admin's information When I send a valid request with the account's authorization token Then the account is updated.
A15	Given I want to update an existing admin's information When I send a request with an invalid authorization token Then I receive an error code.
A16	Given I want to delete an admin account When I send a valid request with the account's authorization token Then the account is deleted.
A17	Given I want to delete an admin account When I send a request with an invalid authorization token Then I receive an error code.
A18	Given I want to retrieve a list of administrators When I send a valid request Then I receive an error code.
<p style="text-align: center;"><b>Warehouse Behaviors</b></p> <p>Users want to be able to create and interact with a list of warehouses, and keep their warehouse data secure from malicious users.</p>	
W1	Given I Am Logged Out When I Attempt To Navigate To Warehouses

	Then I Can Not See Warehouse Information
W2	Given I Am Logged In When I Attempt To Navigate To Warehouses Then I Can See My Warehouses
W3	Given I Am On Warehouses When Correctly Modify "Warehouse" Then "Warehouse" Fields Have "Been" Changed
W4	Given I Am On Warehouses And I Entered Correct Information When I Submit The Form Then A New Warehouse Is Created
W5	Given I Am On Warehouses And I Entered Incorrect Information When I Submit The Form Then A New Warehouse Is Not Created
W6	Given I Am On Warehouses When Delete A Warehouse Then The Warehouse Is Deleted
W7	Given I want to create a new warehouse When I send a valid request to the exposed endpoint Then a new warehouse is created.
W8	Given I want to create a new warehouse When I send an invalid request to the exposed endpoint Then I receive an error code.
W9	Given I want to retrieve certain warehouses under an account When I send a valid request with the account's authorization token Then I receive a list of the account's warehouses.
W10	Given I want to retrieve certain warehouses under an account When I send a request that is invalid Then I receive an error code.
W11	Given I want to update an existing warehouse under an account And I have a valid authorization token for the account When I send a request to update the warehouse information Then the warehouse is updated.
W12	Given I want to update an existing warehouse under an account

	When I send a request that is invalid Then I receive an error code.
W13	Given I want to delete a warehouse under an account When I send a valid request with the account authorization token Then the warehouse is deleted.
W14	Given I want to delete a warehouse under an account When I send a request with an invalid authorization token Then I receive an error code.
<p style="text-align: center;"><b>Inventory Behaviors</b></p> <p>Users want to add items to their warehouse's inventory and make changes as those items are used.</p>	
I1	Given I Am On "Warehouse" When I Click "btnManageWarehouse" Button Then I Am Taken to "Item" And I Can See Only Those Warehouse Items
I2	Given I Am On "Item" When I Click "btnAddItem" Button Then "Add Item" Fields Are Visible
I3	Given I Am On "Item" And I Entered Correct Information When I Submit The Form Then Item Is Added To Warehouse
I4	Given I Am On "Item" When I Click "btnUpdateItem" Button Then "Item Modification" Fields Are Visible
I5	Given I Am On "Item" When I Correctly Modify "Item" Then "Item" Fields Have "Been" Changed
I6	Given I Am On "Item" And I Am Currently Modifying "Item" When I Click "btnCancel" Button Then "Item" Fields Have "Not Been" Changed
I7	Given I Am On "Item" When I Click "btnDeleteItem" Button Then "Item" No Longer Exists

I8	Given I Am Logged Out When I Attempt To Navigate To "Item" Then I Can Not See "Item" Information
I9	Given I Am On "Item" And I Incorrectly Update "Item" When I Click "btnUpdateItem" Button Then "Item" Fields Have "Not Been" Changed
I10	Given I Am On "Item" When I Incorrectly Add "Item" When I Click "btnAddItem" Button Then I See An Error Message
I11	Given I want to retrieve items that are in a warehouse When I send a valid request with the account's authorization token Then I receive the existing items requested.
I12	Given I want to retrieve items that are in a warehouse When I send a request with an invalid authorization token Then I receive an error code.
I13	Given I want to put a new item in a warehouse When I send a valid request with the account's authorization token Then the item is added to the warehouse.
I14	Given I want to put a new item in a warehouse When I send an invalid request Then I receive an error code.
I15	Given I want to update an existing item in a warehouse When I send a valid request with the account's authorization token Then the item is updated.
I16	Given I want to update an existing item in a warehouse When I send a request with an invalid authorization token Then I receive an error code.
I17	Given I want to delete an existing item in a warehouse When I send a valid request with the account's authorization token Then the item is deleted.
I18	Given I want to delete an existing item in a warehouse When I send a request with an invalid authorization token Then I receive an error code.

Usability Behaviors				
Users want to be able to easily utilize the website, understanding the structure of stored data and being able to navigate the website with ease.				
U1	Given the user is logged in And the user wants to see their warehouses When they are on <page> Then there's a button they can click			
U2	Given I Am On "<page1>", When I Click "<button>" Button Then I Am Taken To <page2>
